Professional Summary

Backend Software Engineer with 2+ years of experience building scalable, high-performance systems using Node.js, NestJS, and FastAPI. Skilled in microservices architecture, real-time systems, and robust API design. Experienced in CI/CD automation, containerized deployments, and system monitoring with ELK Stack and Grafana. *Check the links below to view my LinkedIn, GitHub, and Portfolio.*

Technical Skills

Principles: SOLID, OOP, Databases, System Design, Design Patterns

Backend: NestJS, Node.js, FastAPI, Express.js, REST API, Microservices, SSE, WebSockets, GraphQL

Databases: PostgreSQL, MongoDB, Redis, Prisma ORM, TypeORM, Elasticsearch

DevOps & Tools: Docker, Nginx, Linux, GitHub Actions, ELK Stack, Grafana

Blockchain : Solidity, Smart Contracts, Hardhat

Programming: JavaScript, TypeScript, Python

Security: JWT, OAuth2, API Security, Encryption, Hashing, RBAC

Testing: Jest, Unit Testing

Frontend (Supporting): React.js, Next.js, Tailwind CSS

Professional Experience

Tyrhal Dec 2025 – Present

Backend Engineer (Part-time) *Remote*

- Built and maintained core backend services for a travel marketplace connecting agencies with customers across the MENA region using NestJS and PostgreSQL.
- Worked on production APIs used by real users, agencies, and bookings in a live environment.

Ammerli Sep 2025 – Present

Backend Engineer (Freelance) *Remote*

- Developed a B2B platform connecting supermarkets with wholesalers using NestJS, PostgreSQL, Redis, and TypeORM.
- Integrated Chargili payment and smssak notification services.
- Implemented RBAC and JWT authentication with modular architecture for scalability.

Folia School Jun 2025 – Augst 2025

Backend Instructor *Boumerdes, Algeria*

- Taught backend engineering fundamentals covering Node.js, NestJS, database design, and REST API development.
- Mentored students through project-based learning and best practices in API design and deployment.

Portals - Event Management Platform Feb 2025 – May 2025

Backend Developer (Freelance) *Remote*

- Engineered backend services in NestJS and PostgreSQL using Prisma.
- Implemented real-time notification system (SSE).
- Delivered analytics APIs powering dashboards for users.

Hackathon Achievements

Qurbani Hackathon – Winner 2025

- Developed AI-powered Qurbani management system for donation transparency and real-time validation.

Caravane Assurini – 2nd Place 2025

- Built a prototype improving local insurance workflows through automation and digital verification.

Certifications

Backend Fundamentals — 2025

Realtime Backend System Design with WebSockets — 2025

Education

Higher National School of Computer Science (ESI SBA) Sep 2023 – Present

3rd Year Engineering Degree in Computer Science (Expected 2028) *Sidi Bel Abbès, Algeria*

- Relevant Coursework: Advanced Algorithms, Distributed Systems, Database Design, Software Engineering, Web Development.

Volunteering

Google Developer Student Club (GDSC) SBA 2024 – Present

Volunteer / Organizer *Sidi Bel Abbès*

- Contributed to workshops and mentoring sessions focused on backend technologies and modern web development.
- Supported community growth through event organization and peer mentoring.
